

03 Sortable goal list

The core view. Sort controls sit above the list at every breakpoint; the active key is the only element carrying the pop color. Phone drops to two columns of data per row, tablet to four, desktop to five.

05 Single goal detail

Amount remaining leads at display size; everything else is supporting evidence in a flat detail table. Phone pushes a full screen, tablet splits two columns, desktop opens a side panel so the list stays in view.

06 Add / edit a goal

Six fields, no wizard. Target amount is the only value typed from scratch, so it gets the display-size input and the single underline in pop color. Editing reuses the same form pre-filled.

07 Completed-goals archive

Sorted by the newly added **Recently completed** key. Completion checks stay grey so the pop color continues to mean interactive; desktop adds four summary tiles and a next-goal prompt.
